

# COMPLETE STREETS WORKSHOP

January 24, 2012 4:00 PM to 7:00 PM

The Baystate Roads Program, in conjunction with the Massachusetts Department of Transportation and the UMass Transportation Center, is offering a free three-hour Complete Streets introductory workshop.

The “complete streets” concept asks local officials, planners, public health officials and transportation specialists to step back and examine how road design can best serve all users in order to improve municipal transportation networks and make streets more conducive to physical activity. The workshop will define “complete streets,” communicate the transportation, public health and environmental benefits, and discuss implementation strategies for municipalities. A light dinner will be provided.

## Workshop Location

Berkshire Regional Planning Commission  
1 Fenn Street, Suite 201  
Pittsfield, MA 01201
